

- Beth Buckley, PharmD, CDCES (Certified Diabetes Care and Education Specialist), is a Professor of Pharmacy Practice at the Concordia University Wisconsin School of Pharmacy, where she has a teaching role within all years of the curriculum with a focus on Applied Patient Care Skills Lab, Diabetes Pharmacotherapy, and electives in the areas of diabetes and wellness.
- Her professional experience includes three decades of clinical work in pharmacy practice, with a current role as an ambulatory care pharmacist where she works with a Collaborative Practice Agreement to provide chronic disease state management within a primary care clinic.
- She is a strong advocate for increasing awareness and education on interventions to support physical, mental, and spiritual wellness - within her roles as an educator, a pharmacist, and as a certified yoga and mindfulness teacher.
- Research experience includes principal investigator for multi-center trials in collaborative care for the underserved with a diabetes and hypertension focus, and exploration of the landscape of well-being in pharmacy program curricula across the USA and Canada, with several peer-reviewed publications and presentations related to the well-being focus. She co-developed the AACP Community for Well-being and Resiliency, where she continues to moderate the group with discussion, webinar development and delivery, and scholarship opportunities to support the cultivation of well-being within the pharmacy profession, starting with training in schools.
